Internship Offer Letter

Student Name : NAVEEN S K
Stream : B.Tech
Branch : B.Tech(Computer Science and Engineering)
Institute Name : Chennai Institute of Technology
Internship Domain : AWS AI-Powered Cloud Engineer
Internship Duration : April 2026 - June 2026
AICTE Student ID : STU69241f96065981763975062

We are pleased to inform you that you have been selected for the 8-Week **AICTE – EduSkills Virtual Internship Program**.

During this internship, you will learn and demonstrate industry-relevant skills that will enhance your employability and strengthen your confidence in the subject area.

The program is designed to provide structured learning combined with practical exposure.

Internship Structure & Evaluation:

- The internship will follow a **week-wise structured learning plan**.
- You will be required to complete **weekly assessments** to track your progress and understanding.
- Certain modules will require submission of **project documentation and assignments**.
- In the final week, you must appear for a **Final Assessment Test**.
- The final grade will be based on your overall performance, including weekly assessments, project submissions, and the final test.

Upon successful completion of all required steps and assessments, you will be awarded a **Virtual Internship Certificate**.

Please note that this offer letter will be considered valid only after the successful completion of the internship program and fulfillment of all assessment requirements, including obtaining the final completion certificate. Without the final completion certificate, this offer letter shall not be treated as a valid document for any official purpose.

The week wise Structure of the Internship is as Follows:

Week	Module	Description
Week 1	Introduction to Cloud & Getting Started with Storage	Cloud 101 and AWS Storage introduce cloud fundamentals, core concepts, AWS services, S3 storage, data management, scalability, security, and selecting optimal cloud solutions
Week 2	Getting Started with Compute & Getting Started with Networking	AWS compute with EC2 and networking with VPC, covering instance types, configuration, storage, security, virtual networking, and AWS networking services.
Week 3	Getting Started with Databases	Database fundamentals and Amazon RDS, teaching learners to configure, manage, secure, and maintain scalable relational databases in the AWS Cloud.
Week 4	Getting Started with Cloud Operations	AWS Cloud Operations, covering cloud management, the Well-Architected Framework, cost optimization, operational tools, and strategies to efficiently manage secure cloud infrastructure.
Week 5	Getting Started with Security	AWS Identity and Access Management (IAM), teaching learners to manage users, groups, roles, permissions, security policies, and explore additional AWS security services.
Week 6	Getting Started with Serverless	AWS Lambda and serverless computing, teaching learners to create, configure, and monitor functions, decouple architectures, and explore additional AWS serverless services.
Week 7	Machine Learning Foundations	Fundamental machine learning concepts and the machine learning pipeline, enabling learners to apply these principles to solve real-world business problems.
Week 8	Introduction to Generative Artificial Intelligence	Generative AI, covering its concepts, benefits, foundation models, and AWS services to build and deploy generative AI solutions.
Final Credential Validation/Internship Grade Point Assessment		

Note: There is no stipend associated with this internship.

We congratulate you on your selection and wish you a successful learning journey.
